Population and Housing Narrative Profile: 2011

2011 American Community Survey 1-Year Estimates

Although the American Community Survey (ACS) produces population, demographic and housing unit estimates, it is the Census Bureau's Population Estimates Program that produces and disseminates the official estimates of the population for the nation, states, counties, cities and towns and estimates of housing units for states and counties.

Households and Families

In 2011 there were 72,000 households in Shawnee County, Kansas. The average household size was 2.4 people.

Families made up 63 percent of the households in Shawnee County, Kansas. This figure includes both married-couple families (48 percent) and other families (15 percent). Of other families, 8 percent are female householder families with no husband present and own children under 18 years. Nonfamily households made up 37 percent of all households in Shawnee County, Kansas. Most of the nonfamily households were people living alone, but some were composed of people living in households in which no one was related to the householder.

In Shawnee County, Kansas, 31 percent of all households have one or more people under the age of 18; 25 percent of all households have one or more people 65 years and over.

The Types of Households in Shawnee County, Kansas in 2011

Explanation of Symbols:

1. An '***' entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.
2. An '-' entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.
3. An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.
4. An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.
5. An '****' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.
6. An '*****' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.
7. An 'N' entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.
8. An '(X)' means that the estimate is not applicable or not available.
