Click on ProQuest Nursing and Allied Health

Click [My Research](#) at the top right side of the screen to create an account or sign in. Then choose [Publications](#).

## ProQuest Nursing & Allied Health Source

[Basic Search](#) | [Advanced](#) ▼ | [Figures & Tables](#) | [Publications](#) | [Browse](#) | [About](#)

Enter the publication title and click [search](#) then click on the name of the desired publication to continue.

The screenshot shows the 'Publication Search' page. A search bar contains 'ABNF Journal' and the search criteria is set to 'In title'. A 'Search' button is visible. Below the search bar, it indicates '1 publications' and provides options to 'Back to full list', 'View summary', and 'View title only'. There is also a 'Full text only' filter and a 'Go' button. A list of results shows '1' result for 'ABNF Journal' with a 'Full text available' icon. A callout bubble points to the 'Set up alert' link in the 'Publication Information' section.

Click Set up Alert

The 'Publication Information' section shows options to 'Set up alert' and 'Create RSS feed'.

The 'Set up publication alert' form is shown. It includes a 'Help' link and instructions to create and schedule email alerts. The form is divided into two steps: 'Step 1 - Review publication details' and 'Step 2 - Define your alert email'. Under Step 1, the publication is 'ABNF Journal;LISLE' with full text coverage from 'Jan/Feb 1999-Current'. The 'Send this alert' section has two radio buttons: 'When either Citation/abstract or Full text is available.' (selected) and 'Only when Full text is available.'. Step 2 includes fields for 'Send to:', 'Subject:' (pre-filled with 'ABNF Journal;LISLE'), 'Message (optional)' (with an 'Add message' button), 'Email format:' (radio buttons for 'HTML' (selected) and 'Plain text (no images or text formatting)'), and 'Stop After' (a dropdown menu set to '6 months'). A note at the bottom states 'You will have the opportunity to extend this alert before it expires.' and there are 'Create alert' and 'Cancel' buttons.

Enter email address and set parameters. Recommended settings:  
Email format: HTML  
Email Contents: Individual Articles  
Alert only when full text available
